EDUCATION Liberty University - Lynchburg, Virginia

Aug 2018 - May 2022

Bachelor of Science in Information Systems: Database Management

EXPERIENCE ZT Systems –Senior RMA Repair Server Test Technician | Linux, PowerShell, Excel

Aug 2023 - Current

- Conducted comprehensive testing & repair on servers and individual components upon arrival in the lab to identify and diagnose issues promptly, ensuring to document the results from testing and updating various excel sheets and applications with data from testing and repairs.
- Created an automated data metrics sheet that details the status of all servers in the lab and created internal documentation on testing and repairing servers.
- Demonstrated and explained our teams' processes to clients, visitors, and other departments breaking down complex and advanced technologies in an easily digestible manor.
- Collaborated with test engineering team to escalate and resolve issues with testing.
- Trained new team members and provided support in managing the lab by performing equipment repair and maintenance, test station set up, and ensuring safety and cleanliness standards were met.

Hoboken Grace - Data Cleanup Leader | Python, Excel, AWS, Terraform

Sep 2022 - Current

- Lead the team to perform weekly data cleaning, validation, and data analysis using Excel and Google Spreadsheets before migrating data to an online platform for advanced analysis.
- Developed infrastructure as code (IaC) solutions for AWS to automate data collection and cleaning using Terraform and Python allowing staff to spend less time performing some of the data analysis tasks manually.

PROJECTS Capstone – Full Stack Event Coordination Web Application | JS, Java, SQL, Azure

Aug 2021 - May 2022

- Partnered with a local non-profit organization to develop an online event coordination and file management platform. Met with client weekly to give Excel and PowerPoint presentations on site progress and analytics based on multivariate testing feedback on test users to decide next course of action.
- Implemented MVC Agile Framework Design, utilized Azure for database backups, and employed JS, Java, SQL, and PHP for front-end and backend functionalities.

Community Service Habitat for Humanity Volunteer/ Data Entry, Lynchburg, Virginia

- Constructed houses, cleaned facilities, and undertook administrative and clerical duties at Habitat ReStore such as managing schedules, answering phone calls, greeting visitors, and data entry.
